Sept. 4, 1975

Dear Mr. Weisberg,

Enclosed find articles clipped and peroped by Robert. Also find three articles on neutron activation analysis. While I was finally able to find some materials on NAA at the Brooklyn Law School Library and the New York City Police Academy Library, further materials, which I found at the Police Academy Crime Lab, I was not allowed to duplicate. (This was a matter of policy even for the lab people who work there. The Police were surprisingly helpful, though.) I would recommend a further general article on NAA which appears in

Law Enforcement Science + Technology
Volume 2 - 1968

The publication is out of a symposium of police scientists and is very worthwhile if you can find it. I believe the article on NAA is written by the Krishnan cited in the bibliography of the article from the criminology dept.

Materials on spectrographic analysis which would meet your specifications are somewhat harder to come by, but I shall continue to look for them if you wish.

I hope the articles I'm sending are useful to you. I wanted to send you what little I've found to see if it is what you are looking for and will be pleased, at your request, to look for more related materials or do whatever other work you might wish to send my way.

Best regards,
Jerry Kay
